

ResinDek® LD50

ResinDek® LD50 Product Description

Cornerstone Specialty Wood Products, LLC has developed ResinDek® LD50 to out perform most 3/4" mezzanine panels on the market today. Although only 1/2" thick these panels still provide durability in heavy use for mezzanine applications in every industry.

Because of their unique design, the 1/2" ResinDek® LD50 panels can support up to 2,000 lbs. which places them on par with many 3/4" thick panels in today's marketplace. Thinner panels save money in freight, initial costs, and installation time.

All ResinDek® panels are made with specially sorted and processed wood fibers, customized formaldehyde free resins, and a wax emulsifier. The ingredients are combined and compressed under extremely high pressure and temperature, resulting in a panel with superior physical properties that are especially designed and built to withstand heavy rolling cart and pallet jack loads.

ResinDek LD50 Specifications

Mezzanine Floor Panels shall be ResinDek® LD50 as manufactured by Cornerstone Specialty Wood Products, LLC (CSWP).
