

THE resinDEK® ENQUIRER

Volume 6, Issue 1, June 2011

What Inquiring DCs want to know!

ResinDek® Panel Changes Make Installations Easier

All ResinDek® panels now have identification markings on the edge of the panel. This new laser mark will make it easier to identify panels in the field for special layouts and drawing references. Installers can now locate all components of the flooring system and do layouts accordingly since the edge markings indicate type of panel with special drawing tags.

New laser markings ID panel & drawing notes

Sizing Up ResinDek®

Cornerstone Specialty Wood Products, LLC has recently invested in new equipment to tighten tolerances and to provide additional tongue and groove capabilities.

The new technology allows ResinDek® panels to be manufactured with a tolerance of plus or minus 1/16" (.0625). Panels will be factory inspected according to new internal specifications. The thickness tolerance will continue to exceed most industry standards and is still plus or minus 0.01".

Tongue and groove of 4' x 10' ResinDek® panels is now offered on all 4 sides. This new capability will prevent costly cutting and custom fitting in the field, and provide an enhanced seamless appearance.

ResinDek® Sample Kit Update!

New literature for the ResinDek® Sample Kits is now available. We have redesigned our literature to be a standalone product guide that supports all information on resindek.com website.

These are currently used in every sample kit or can be used for general sales presentations.

Make sure your sample kits have been updated with this new literature, call us and order what you need today!

To stay informed of new products, industry news, and jobsite happenings please sign up for the ResinDek® e-newsletter here <http://www.resindek.com/>

Expect More, Install

resinDEK®

- Reduced back strain= fewer lost time injuries
- More resilient work surface than bar grate or concrete
- ResinDek® is a carbon negative product since it absorbs more during its life cycle than it emits
- ResinDek® can take 56 cars off of the road for 1-year if used instead of concrete on a 50,000 sq. ft. mezzanine
- ResinDek® saves \$2-\$5 per sq. ft. vs. bar grate or concrete
- ResinDek® XLD₅₀ and LD₅₀ can save 30% in freight

Cornerstone Specialty Wood Products Introduces New Field Service Engineer

The Cornerstone Specialty Wood Products Team is excited to have Robert Lancaster on our team!

Bob joins us with over 35 years of distribution center design, planning, & installation experience throughout the USA. Bob has an Industrial Arts degree from Eastern Kentucky University. Bob is responsible for assisting the Cornerstone Specialty Wood Products Engineering Staff and customers with ResinDek® installations at jobsites. He will also be assisting with project applications, quotes, AutoCAD® layouts, and testing.

Robert Lancaster

We are committed to providing engineered solutions in our products and services, and our goal is to make every job a showcase for you and your customers. Call Bob Lancaster for your next project to make sure you get the showcase installation you deserve! Bob can be reached at 888-755-3048 X220 or RLancaster@resindek.com.

In Case You Missed It!

Greg Doppler, President of Cornerstone Specialty Wood Products, LLC, was recently published in The MHEDA Journal, "Value Engineering-New Opportunities to grow material handling sales." <http://www.themhedajournal.org/index.php/2011/04/value-engineering/>

Welcome New International ResinDek® Partner

Tecnequip, Tecnologia Em Equipamentos (Technology in Equipment) is a company that imports, manufactures, and distributes solutions for mezzanine floors and industrial platforms located in São Paulo, Brazil.

As the exclusive distributor in Brazil, Tecnequip recently exhibited 1,000 square feet of ResinDek® Xspan® at the first CeMAT Trade Show hosted in Brazil. The CeMAT South America Trade Show was held at the Imigrantes Exhibition Center, in São Paulo.

With Tecnequip's commitment to stock ResinDek® panels in São Paulo, it will make it much easier to respond to the needs of the Material Handling Industry in Brazil.
